Python Coding Workshop for Form 1 Students

In the second term, our school held a successful Python Coding Workshop for our Form 1 students. We extend our sincere gratitude to the support from one of our distinguished alumni, Ir Dr. Kwok Tai Wai, the Founder and Chairperson of Insquare Foundation Limited.

This event provided our Form 1 students with the opportunity to gain a basic understanding of coding using the Python programming language. Through interactive sessions and hands-on activities, our students were introduced to the fundamentals of programming.

The workshop was designed to spark our students' interest in computer science and equip them with essential coding skills. By exposing our young learners to the world of programming, we aim to nurture their logical thinking, problem-solving abilities, and digital literacy, preparing them for the technological advancements of the future.

We would like to extend our heartfelt appreciation to Ir Dr. Kwok Tai Wai and the Insquare Foundation Limited for their generous support and commitment to providing our students with valuable learning experiences. This collaboration is a reflection of our school's dedication to offering diverse and enriching educational opportunities that empower our students to excel.

Through such initiatives, we continue to inspire and empower our students to explore their interests, develop their skills, and make a positive impact on the community.
