

Other Learning Experiences (OLE)

Due to disruption caused by the pandemic COVID-19, the school has not been able to hold any study trips. In view of this the OLE Committee organised an event namely *OLE in Retropect*, offering students a chance to have a glimpse of the past OLE events. This could give students a better idea of the committee' s activities, raising their interest in activities of similar kinds. The bulletin boards displayed were prepared by the travel agent. They depicted six different types of study trips with vivid photos. There were bulletin boards to highlight the recent trip to Japan with and students' first-hand experience and their sharing. The staff from the travel agent came to our school on 1 March and and 3 March to address questions raised by students.

This year the committee has a newly organised student-LED project for a team of students who have devised and held their own activities. This is a whole new experience to students. The group just planned and organised a fun Christmas party for children in Tsuen Wan Centre of the Hong Kong Federation of Youth Groups. The group prepared some rare knowledge about Christmas and taught children social manners for community activities. The even gave the children an enjoyable afternoon.

To help broaden students vision, develop their multiple intelligence and to make them all-round with development in ethics, intellect, physique, social skills and aesthetics, have positive values and attitudes, the school provides students with a wide range of other learning experiences. This allows students to develop themselves outside classroom. As of the beginning of March, the school has held the following activities for students: blood donation, Hong Kong Outstanding Youths Election, Community Tour Guide Programme and Penmanship Competition by Oxfam
