

The Big Eight – Dinosaur Revelation Exhibit Visit

HCYers visited the biological exhibition at Hong Kong Science Museum on 11th October 2022. The exhibition boasts an unrivalled amount of original fossil material, some of the most complete fossil skeletons in the world, world-class artwork, cutting-edge 3D renderings and the first scientifically accurate reconstructions of the world's largest predatory dinosaur and the world's largest flying creature. The exhibition raised students' awareness of global warming and biodiversity loss.
