

“MobileFashion” Ecoaquarium

To promote STEAM education, the “MobileFashion” Ecoaquarium was set up in the Biology Laboratory. The Ecoaquarium is equipped with a water quality monitoring system and a 24-hour online surveillance camera. Through observing the interaction among aquatic organisms, students can enrich their knowledge about ecosystem and raise awareness in conservation. To get a 24-hour access to the “MobileFashion” Ecoaquarium, please scan the following QR code to register an account.
