

Mathematics and Science Week 2023-24

Mathematics and Science Week was held from May 20 to May 24, 2024 at our school, showcasing the talents and achievements of our students in these important STEAM fields.

To complement the week-long activities, during lunchtime there were engaging math game booths, captivating science experiment stations, a STEAM project exhibition by our S1 students, and a project showcase by our S4 students on campus. These interactive sessions allowed our students to collaborate, problem-solve, and exchange innovative ideas.

The highlight of the week was the culminating Science and Mathematics Activity Day on May 24th. Students participated in the highly anticipated Inter-house Mathematics Quiz, where Benevolence House emerged as the champion, Elegance House secured the second place, and Integrity House claimed the third place.

The “HCY Hat” STEAM Competition also took place, showcasing the exceptional creativity and technical expertise of our students. In this competition, Class 3C was crowned the overall junior-form champion, while Class 5E took the top honor in the senior-form category.

These events were a testament to the dedication, passion, and academic excellence of our students in the STEM disciplines. We are immensely proud of their achievements and look forward to nurturing their continued growth and innovation in the field of mathematics and science.
