

## Student-LED Group Volunteer Activity - Beach Clean-up

In response to the call by Hong Kong environmental charity 'Plastic Free Seas' for community-led initiatives, our school's student-LED committee organized a beach clean-up on 19 February. Twelve HCY students rolled up their sleeves to clean Ting Kau Beach, collecting waste and learning about the impact of pollution. Through this hands-on activity, they gained a deeper understanding of different types of waste and the importance of protecting our environment and ecosystems.
