

## Participation of HCYers in the Kei Wai "One Heart" Parent-Child Learning Day

To promote STEAM education in the community, our STEAM committee organized a student outreach event at CCC Kei Wai Primary School on December 13, 2025. Our students hosted a robotics game booth featuring custom games that they designed themselves. This project aimed to provide players with an interactive experience involving robotic technology. The booth attracted numerous primary school and kindergarten students, successfully sparking their curiosity and interest in robotics.

Beyond community engagement, this initiative offered our students a valuable opportunity for "service learning." By applying their technical skills in a real-world setting, they were able to deepen their understanding of the curriculum while making a positive impact on the community.
