

Awards from The Economic Infographic Challenge

The Economic Infographic Challenge, organised by the Education Bureau, served as a pivotal initiative for fostering students' data literacy. By engaging with this activity, students refined their ability to interpret and apply complex economic infographics. Furthermore, the programme facilitated a deeper understanding of the practical intersection between economic theory and its application within the realms of business and technology. The list of award-winning students from our school is as follows:

Award	Awardees
