

Team Excellence at the PolyU Science Young Talents Competition 2026

A team consisting of four 5D students—Chan Yik Lok Jake, Hui Yi Lok Enoch, Wong Yip San Jason, and Yam Hiu Hong Hugo—demonstrated outstanding scientific knowledge and problem-solving skills at the “PolyU Science Young Talents Competition 2026”, earning the award “Team with excellent performance”.

Organized by the Faculty of Science at The Hong Kong Polytechnic University, the competition featured a preliminary round and a final round. The preliminary round tested students' theoretical knowledge in Biology & Food Science, Chemistry, and Physics through multiple-choice questions. The final round, held on the PolyU campus, challenged teams to complete several experiments and inquiry-based tasks within a limited time, testing their scientific thinking, creativity, and on-the-spot problem-solving abilities.

Our school extends its warmest congratulations to the four students!
